***Restriction Election***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I      Claims 1, 3(a), 4-6 and 8-12 are drawn to the special technical feature of a method for therapeutically treating a patient having a symptom of cardiovascular disease (1<sup>st</sup> method ) and a vaccine (which is the 1<sup>st</sup> product).

Group II      Claims 2, 3(b), and 7 are drawn to the special technical feature of a method of prophylactically treating a patient having a risk factor for cardiovascular disease (which is the 2<sup>nd</sup> method).

2. An international and a national stage application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept ("requirement of unity of invention"). Where a group of inventions is claimed in an application, the requirement of unity of invention shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features. There is no technical relationship required between Groups I and II. If multiple products, processes of manufacture or uses are

claimed, the first mentioned in the claims of the application and the first recited invention of each of the other categories related thereto will be considered as the main invention in the claims, see PCT Article 17(3)(a) and MPEP 1.476(c). Therefore, Groups I and II are drawn to different methods of using and the products of the invention. The inventions listed as Groups I-~~X~~<sup>II</sup> do not share a corresponding special technical feature under PCT Rule 13.2. Consequently, Groups I-II lack unity of invention.
